This is my first LaTeX document.

Nikita Bukaevskiy

March 4, 2023

1 Introduction

It is the first docment made using a combination of TeXLive, Vim and Live-preview Zathura, so it will be interesting to try and keep up with the flow of most lectures that will be attended and written down using that.

Now, I would like to introduce myself. My name is Nikita Bukaevskiy, and am from great-old city of Rostov-on-Don, The Greatest One there is to this country name Russia. I am an aspiring psychopath that tries to learn C++, and am planning to learn machine code and assembly.

In this document, I will try to cover most of what there is to this beautiful language of writing text that is LaTeX. Sure, it will be no easy task, but that is not the worst thing that could happen to me.

2 Lists

First off, let's try to use some lists, like an enumareted one.

My daily routine:

1. Get up
2. Brush my teeth
3. Have a nice breakfast
4. Get dressed
5. Go to my university
6. Attend lectures and other types of lessons
7. Have lunch
8. Go home
9. Do my house duties
10. Do my homework

11. Have a dinner with my family

12. Free time

13. Go to bed

Of course, that is rather crude and would be much better with associated time, that it would happen in.

But, I don't care that much *yet*.

Let's try to look at an unordered list. For example:

My redeeming qualities:

- I am cool

- I am really cool

- I am cooler than Anton Sopov

- But I do not have a Peugeot 206 that is almost dead.
